Open the 2dTransformations.html file or simply hit “2D Transformations” from the menu to view 2-Dimensional Transformation on the different views of my dream house.

Select R to rotate the view; S for scaling, T for translation; SX for Skewing X-axis; SY for Y-axis Skew and Reset to enter the state representing the numeral 0.

Open the projections.html file or hit “2D Projections” from the menu to view various Geometric Projections for a cube.
